Use Case 1: Landing Page						
Test Case ID	**Prerequisites**	**Title/Description**	**Steps**	**Expected result:**	**Pass / Fail**	**Comments**
UC1-1	The User is not Logged in	Validate that accessing the TimeWise Web app's URL brings up the home screen correctly.	Navigate to the provided URL.	The TimeWise Web app should load with no errors, and user should not be logged in(home page for not logged in users should be displayed)	Pass	
UC1-2	The User is not Logged in	Verify Initial Navigation Button Visibility on Landing Page	1.Access the main URL of the application's landing page in a web browser. 2.Observe the "Optimize Your Time Now!" button is displayed .	The user successfully observes that the "Optimize Your Time Now!" button is visibly displayed on the landing page.	Fail	Bug-Id-1
UC1-3	The User is not Logged in	The application interface must render the primary call-to-action button, labeled "Optimize Your Time Now!". When clicked, this button should successfully navigate the user to the dedicated Login/Register page, allowing them to sign in or create an account	1.Access the main URL of the Timewise web application in a browser 2.Locate the call-to-action button with the exact text "Optimize Your Time Now!" on the displayed page. 3.Click the "Optimize Your Time Now!" button. 4. Verify that the browser navigates to the expected Login/Register page URL	The user is successfully directed to the "Login/Register" page.	Pass	
UC1-4	The User is not Logged in	The application provides an optional link that allows the user to view the video titled "10 Time Management Tips to Boost Your Productivity".	1.Ensure the phrase "10 Time Management Tips to Boost Your Productivity" is an active hyperlink in your interface. 2. Confirm the link points correctly to the intended video source. 3. A user should be able to click the text and be directed immediately to the video playback page.	The user's browser or application is immediately directed to the specified video hosting platform.	Pass	

*** If you want to add a new line in a cell, use Alt + Enter**

Use Case 2: User Registration						
Test Case ID	**Prerequisites**	**Title/Description**	**Steps**	**Expected result:**	**Pass / Fail**	**Comments**
UC2-1	The User is not registred	Verify Form Field Presence and Functionality	1. Navigate to the registration page. 2. Attempt to interact (click/tab) into each text input field to ensure focus is received and text can be entered.	All specified text inputs, checkboxes, and buttons are displayed correctly and are interactable.	Pass	
UC2-2	The User is not registred	Verify the Terms of Service Elements	1. Verify the Terms of Service Elements 2. Confirm that a checkbox is present next to the text. 3. Confirm that the word "terms" within the descriptive text is underlined and clickable. 4. Click the "terms" hyperlink.	The checkbox can be toggled on and off. Clicking the hyperlink navigates the user to the correct Terms of Service page	Fail	Bug-Id-2
UC2-3	The User is not registred	Verify the Visual Text on the Action Button	1. Navigate to the User Registration page URL. 2. Locate the primary action button at the bottom of the form designed to submit the user's data. 3. Read the text displayed on the surface of the button	The button text visually displays either "Sign Up", "Create Account", or "Register".	Fail	Bug-Id-3
UC2-4	The User is not registred	User's legal last name	1. Navigate to the User Registration page URL 2. Visually inspect the labels associated with the text input fields 3. Focus specifically on the third name input field, which typically collects the user's surname. 4. Read the accompanying label text for this field.	The label for the third required name field should clearly read "Last Name"	Fail	Bug-Id-4
UC2-5	The User is not registred	A user provides all valid, required information and successfully creates an account on the first attempt.	1. The user navigates to the Registration/Login page. 2. Press the Register button 3. The user enters their First Name, Middle Name, Last Name, Username, and Email. 4.The user enters a secure password into the Password field. 5.The user re-enters the exact same password into the Repeat Password field. 6. The user checks the "I agree to the Terms of Service" checkbox. 7.The user clicks the "Sign Up" button.	User is registered successfully	Pass	
UC2-6	The User is not registred	Test Maximum Character Limit for "First Name"	1.Navigate to the User Registration page URL. 2.In the "First Name" input field, enter a string exactly 41 characters long (the boundary condition test): qwewqewqewqeqwewqewqewqeq3e31r312wqeewqee 3.Fill in all other required fields with valid data . 4.Check the "Terms of Service" checkbox. 5.Click the "Sign Up" button.	The form submission should be blocked. An inline validation error message should appear	Fail	Bug-Id-5

Use Case 3: User Login						
Test Case ID	**Prerequisites**	**Title/Description**	**Steps**	**Expected result:**	**Pass / Fail**	**Comments**
UC3-1	The user is on the combined Register/Login page URL.	Access Login Interface via dedicated "Login" Button	1.Navigate to the primary application entry URL 2.Locate the interactive element intended for navigation to the sign-in area. 3.Click the "Login" button.	The test passes when the user interface successfully transitions to the login screen and is ready for user credentials	Pass	
UC3-2	The user has successfully navigated to the dedicated Login page	Verify All Login Form Elements are Present: Username or Email, Passowrd, Remember me Check box, Forgot password option, Sign in button	1. Navigate to the Login page . 2. Visually confirm that all elements listed in the table above are displayed on the screen.	All required input fields ("Username or Email", "Password") and supplementary elements ("Remember me" checkbox, "Forgot password" link, "Sign In" button) are clearly visible and correctly labeled according to the specifications.	Pass	
UC3-3	The user is viewing the Login Form interface.	Navigate to Restore Password Page via "Forgot Password" Link	1.Navigate to the Login page 2.Locate the "Forgot password?" hyperlink below the password input field. 3.Click the "Forgot password?" link.	The application successfully navigates away from the Login page to the designated "Restore Password" page where the user can enter their email address for verification.	Fail	Bug-Id-6
UC3-4	The user is viewing the Login Form interface.	Verify Access to the Registration Form (Two Paths): Access Registration Interface via "Register" Button AND Bottom Hyperlink	1.Navigate to the dedicated Login page URL 2.Locate the prominent interactive element intended for new user sign-ups (labeled "Register"). 3.Click the "Register" button.	The UI should transition seamlessly to the Registration form (displaying First Name, Last Name, etc.).	Fail	Bug-Id-7
UC3-5	The user is viewing the Login Form interface.	Verify Login Functionality using valid Email Address	1.Navigate to the Login page URL. 2.In the "Username or Email" field, enter a valid, registered email address. 3.Enter the correct password. Click "Sign In".	User is successfully logged into their account.	Pass	
UC3-6	The user is viewing the Login Form interface.	Login using Valid Username	1.Navigate to the Login page URL. 2.In the "Username or Email" field, enter a valid, registered username. 3.Enter the correct password associated with that account. Click "Sign In".	User is successfully logged into their account.	Fail	Bug-Id-8

Use Case 4: Home Page and Navigation						
Test Case ID	**Prerequisites**	**Title/Description**	**Steps**	**Expected result:**	**Pass / Fail**	**Comments**
UC4-1	User has valid credentials and successfully completes the login process.	Verifies that after a successful login the user is correctly routed to the application's Home Page. It also confirms the essential navigation bar elements are present	1.Log into the application using valid credentials (email and password). 2.Observe the page the user lands on immediately after authentication is complete. 3.Verify the presence of the Navbar at the top of the screen. 4.Within the Navbar, locate the clickable "Home Page Link" 5. Locate the "User Profile Icon" in the top-right of the Navbar	The user lands on the designated application Home Page	Pass	
UC4-2	User is logged in and on any main application page.	Accessing Task Boards via Sidebar Menu Links	1.Locate the Sidebar Menu . 2.Identify the three links: "To-Do," "In Progress," and "Done." 3.Click the "In Progress" link. Verify the page content changes accordingly. 4.Click the "Done" link. Verify the page content changes accordingly. 5.Click the "To-Do" link. Verify the page content changes accordingly.	Clicking each respective link in the sidebar updates the main content area of the application to display the correct task board data.	Pass	
UC4-3	User is logged into the application	Successful User Session Termination via "Logout" Button	1.Locate the "Logout" button from the dropdown menu from the top leftside. 2.Click the "Logout" button. 3.Observe the subsequent system action and page transition	The application processes the logout request	Pass	

Use Case 5: Profile Management						
Test Case ID	**Prerequisites**	**Title/Description**	**Steps**	**Expected result:**	**Pass / Fail**	**Comments**
UC-5-1	The user is logged into the application	Access and View User Profile Information via Navbar Dropdown Menu	1.Locate the Profile Icon in the top right navigation bar. 2.Click the Profile Icon to reveal the dropdown menu options. 3.Within the dropdown, locate and click the option labeled "My profile"	The application navigates seamlessly to the dedicated "Profile Management" page/screen.	Pass	
UC5-2	The user is actively viewing the "Profile Management" screen	uccessfully Update and Persist User Profile Details	1.Locate the "EDIT PROFILE INFO" button. 2. Press on the button. 3. Redirect to Editing options 4. Start editing	Redirected to Editing profile page and editing info	Fail	Bug-Id-9

Use Case 6: Task Creation and Management						
Test Case ID	**Prerequisites**	**Description**	**Steps**	**Expected result:**	**Pass / Fail**	**Comments**
UC6-1	User is logged in and viewing the "To-Do" task board.	Successfully Create and Display a New Task on the "To-Do" Board	1.Navigate to the "To-Do" board using the Sidebar Menu . 2.Locate and click the prominent "CREATE TASK" button. 3.A task creation form/modal appears. Fill in the required information: Task Name: "RegualrExam" Description: "Verify new task creation functionality." Start Date: 14/12/2025 12:19. End Date: 15/12/2025 12:20. Ensure the default status selected in the form is "To-Do". Click the "Create" button within the form	The task card visually displays the correct name, status, and dates	Pass	
UC6-2	User is logged in; Local system clock is accurate	Check the correct " Created on /date/time by /name/ " info after completing the task	Ensure the local computer clock shows the correct current time Navigate to the "To-Do" board and open the "CREATE TASK" form. Fill in the form details and click "Create Task" Observe the newly created task card or its detailed view to check the recorded "Created On" time	he "Created On" timestamp accurately displays correct time	Fail	Bug-Id-10

Bug Report

Bug ID	Test Case ID	Priority	Severity	Title	Steps to reproduce	Expected result	Actual result	Comments
1	UC1-2	Low	Low	Spelling error in "Optimize your time now" text	1.Access the main URL of the application's landing page in a web browser. 2.Observe the main call-to-action button displayed prominently on the page.	The button text should correctly display "Optimize Your Time Now!"	The button text currently displays the misspelled word "Organaize" instead of the intended text.	
2	UC2-2	High	Critical	Terms of Service hyperlink is clickable but does not redirect to the terms page	1.Navigate to the User Registration page URL: [https://d1dzr3dh7g0qgk.cloudfront.net/User/Register] 2.Locate the checkbox and the accompanying text: "I have read and agree to the terms". 3.Click the clickable "I have read and agree to the terms" hyperlink	The user is redirected to the official Terms of Service page	The link is clickable (cursor changes to pointer), but the page does not change, and the user remains on the registration form.	
3	UC2-3	Low	Low	Spelling error in "Sign Up" button text	1. Navigate to the User Registration page URL. 2. Locate the primary action button at the bottom of the form designed to submit the user's data. 3. Read the text displayed on the surface of the button	The button text visually displays either "Sign Up", "Create Account", or "Register".	The button text visually displays "Sign In".	
4	UC2-4	Medium	Medium	Field intended for "Last Name" is incorrectly labeled as "Middle Name"	1.Navigate to the User Registration page URL: [https://d1dzr3dh7g0qgk.cloudfront.net/User/Register] 2.Observe the sequence of input fields for name entry. 3.Note that both the second and third fields are visually labeled "Middle Name"	The label for the third required name input field should be "Last Name".	The label for the third required name input field is "Middle Name".	
5	UC2-5	High	High	"First Name" field accepts input longer than the maximum allowed 40 characters	1,Go to [https://d1dzr3dh7g0qgk.cloudfront.net/User/Register]. 2.Enter the following string into the "First Name" field: qwewqewqewqeqwewqewqewqeq3e31r312wqeewqee (Total 41 characters). 3.Enter valid data for all other required fields (Last Name, Username, Passwords, etc.). 4.Check the "Terms of Service" box. 5.Click "Sign Up"	The system displays an error message	The account is successfully created	

6	**UC3-3**	High	Critical	The "Forgot Password" text element in the login form is styled as a hyperlink and is clickable, but the associated navigation action is not implemented correctly.	1.Navigate to the Login page URL 2.Locate the "Forgot password?" hyperlink/text. 3.Click the "Forgot password?" link	The user's browser navigates to the dedicated "Restore Password" or "Email Verification" page	The page does not change, and the user remains statically on the login form.	
7	**UC3-4**	High	Medium	clickable but fails to switch views to the Registration form. he requirement states there are two ways to switch to the registration form from the login page. The secondary path—the hyperlink is not functional. When a user clicks this link, nothing happens, preventing access to the registration interface via this specific interaction point.	1.Navigate to the Login page URL 2.Scroll to the bottom of the login form to find the secondary navigation link for new accounts. 3.Click the "Register here" hyperlink text	The system transitions the view to display the complete User Registration form.	The user stays on the Login form page. No action is performed when the link is clicked.	
8	**UC3-6**	High	Critical	Address; fails to log in using valid Username. Currently, the authentication endpoint seems to only validate input formatted as an email address. When a valid, existing username is entered with the correct password, the login attempt fails.	1.Navigate to the Login page URL In the "Username or Email" field, enter a valid, existing username (e.g., Georgiev123). In the "Password" field, enter the correct password for that account. Click the "Sign In" button.	The user is successfully authenticated and redirected to the application homepage.	The login attempt fails.	
9	**UC5-2**	High	Critical	"Edit Profile Info" button is clickable but does not navigate to the profile page	1.Log into the application as a standard user. 2.Click the Avatar/Profile Icon in the top-right navigation bar to open the menu. 3. Click "My profile" 4.Click the button option labeled "Edit Profile Info"	Redirected to Editing profile page and editing info	The user stays on the current dashboard page. No navigation occurs.	
10	**UC6-2**	High	High	The displayed "Created On" timestamp is incorrect. When a new task is created, the timestamp recorded and displayed to the user is significantly incorrect. During testing performed at 12:20 PM EET, the task displayed a time of 10:19. This suggests a systemic issue with how the application handles timezone conversions or retrieves the current time, leading to inaccurate data presentation.	1.Set local machine time to Eastern European Time (EET). 2.Navigate to the application login page and authenticate. 3.Go to the "To-Do" board. 4.Initiate the task creation process and complete submission at approximately 12:20 PM local time. 5.View the details of the newly created task in the UI.	The "Created On" field should display the accurate local time of creation: 12:20 PM.	The "Created On" field displays the incorrect time: 10:19
